Solar Technology

1. Solar-powered watch

This watch is a solar-powered watch containing a solar cell underneath the dial to convert any form of light into "electrical energy" and store the power in a secondary battery.

2. Eliminating the need for battery replacement

Unlike conventional quartz watches, this watch does not use a silver oxide battery, thus eliminating the need for battery replacement.

3. You can use the dial which light transmittance is more than 30%

It is possible to assemble the dial which transmits light on the solar cell. It enabled to cover the solar cell color, and you can design variety colors of dials.

4. Running time

Expected running time from full charge to stoppage will be around 4 months.

5. Power depletion warning function

The two-second intervals movement of the second hand is a signal of energy depletion. The watch continuous running time after two-second intervals movement is approximately 1 day.

Illumination (lux)	Source of light	Environment	Time required (approx.)		
			A	B☆	C
700	Fluorescent lamp	Inside office	-	35 hours	100 minutes
3,000		30w 20 cm	60 hours	4 hours	25 minutes
10,000	Sunlight	Cloudy	20 hours	1.5 hours	8 minutes
100,000		Fine weather	5 hours	15 minutes	2 minutes

<Reference> The illuminance of 1,000 Lx is 70cm under from 30W fluorescent lamp.

Condition A : Time required for full charge.

Condition B : Time required for steady operation.

Condition C : Time required for 1 day's charge.

SEIKO - SOLAR

No Battery Change Required

SEIKO. Solar watch experts since 1977

Sustainable material - AppleSkin™

Apple Skin is a sustainable alternative to real leather. Made in Italy from fruits, in particular, from the skin and core waste of the food industry. Formed by regenerating discarded fruit fiber into a durable material, Apple Skin retains the classic aesthetic of natural leather, offering a standout addition to the modern collection of eco-friendly materials. The strap are vegan and PETA-approved.

Apple skin color reference

Sustainable material - rPET

Recycled PET is made by cleaning post-consumer plastic, for example plastic bottles, this is then shredded into pellets which is crushed and melted. This is then melted and spun into thread. The yarn is clean, strong and reduces plastic waste. This is the material our watch strap is made from.

rPET color reference
